HORNSBY GIRLS HIGH SCHOOL

Mathematics Extension I

Year 12 Higher School Certificate Trial Examination Term 3 2013

STUDENT NUMBER:

General Instructions

- Reading Time 5 minutes
- Working Time 2 hours
- Write using black or blue pen
 Black pen is preferred
- Board-approved calculators may be used
- A table of standard integrals is provided seperately
- In Questions 11 14, show relevant mathematical reasoning and/or calculations
- Marks may be deducted for untidy and poorly arranged work
- Do not use correction fluid or tape
- Do not remove this paper from the examination

Total marks – 70

Section I Pages 3-6

10 marks

Attempt Questions 1 - 10

Answer on the Objective Response Answer Sheet provided

Section II Pages 7 - 11

60 marks

Attempt Questions 11 - 14.

Start each question in a new writing booklet.

Write your student number on every writing booklet.

Question	1-10	11	12	13	14	Total

10 marks

Attempt Questions 1 – 10

Allow about 15 minutes for this section

Use the Objective Response answer sheet for Questions 1 - 10

A polynomial equation has roots α , β and γ , where: $\alpha + \beta + \gamma = -3$, $\alpha\beta + \alpha\gamma + \beta\gamma = -2$ and $\alpha\beta\gamma = 4$. Which polynomial equation has the roots α , β and γ ?

(B)
$$x^3 + 3x^2 - 2x - 4 = 0$$

(C)
$$x^3 + 3x^2 + 2x + 4 = 0$$

(D)
$$x^3 - 3x^2 + 2x - 4 = 0$$

2 The solution to $\frac{4}{x-3} \le 2$ is:

(A)
$$3 \le x \le 5$$

(B)
$$3 < x \le 5$$

(C)
$$x < 3$$
 or $x \ge 5$

(D)
$$x \le 3$$
 or $x \ge 5$

 $\int \cos^2 4x \, dx =$

(A)
$$\frac{1}{2}x + \frac{1}{16}\sin 8x + C$$

(B)
$$\frac{1}{2}x - \frac{1}{16}\sin 8x + C$$

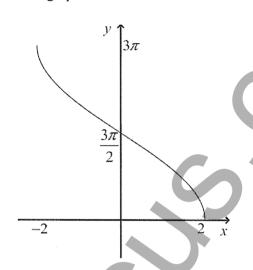

(C)
$$\frac{1}{2}x + \frac{1}{8}\sin 8x + C$$

(D)
$$\frac{1}{2}x - \frac{1}{8}\sin 8x + C$$

4 If P(x) = (x+2)(x+k) and if the remainder when P(x) is divided by (x-1) is 12, then:

- (A) k = 2
- (B) k = 3
- (C) k = 6
- (D) k = 11

5 Which function best describes the graph below?

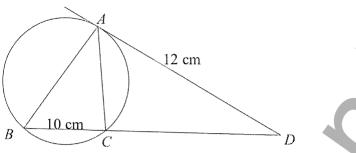

- (A) $y = 2\cos^{-1} 3x$
- (B) $y = 2\cos^{-1}\frac{3x}{2}$
- (C) $y = 3\cos^{-1} 2x$
- (D) $y = 3\cos^{-1}\frac{x}{2}$

If the function f is defined by $f(x) = x^5 - 1$, then the inverse function of f, is defined by $f^{-1}(x) =$

- (A) $\sqrt[5]{x} 1$
- (B) $\sqrt[5]{x-1}$
- (C) $\sqrt[5]{x} + 1$
- (D) $\sqrt[5]{x+1}$

7 ABC is a triangle inscribed in a circle. The tangent to the circle at A meets BC produced at D where BC = 10 and AD = 12. What is the length of CD?

NOT TO SCALE

- (A) 6 cm
- (B) 7 cm
- (C) 8 cm
- (D) 9 cm
- $\int \frac{x^2}{e^{x^3}} dx =$
 - (A) $-\frac{1}{3e^{x^3}} + C$
 - (B) $-\frac{1}{3}e^{x^3}+C$
 - (C) $-\frac{1}{3}\ln e^{x^3} + C$
 - (D) $\frac{1}{3} \ln e^{x^3} + C$
- Consider the curve defined by the parametric equations $x = \frac{1}{t}$ and $y = \frac{t}{t+1}$.

The graph of y = f(x) would have asymptotes:

- (A) x = 0 only
- (B) x = 1, y = -1
- (C) x = -1 only
- (D) x = -1, y = 0

The velocity, v metres per second, of a particle moving in simple harmonic motion along the x axis is given by the equation $v^2 = 36 - 4x^2$.

What is the amplitude, in metres of the motion of the particle?

- (A) 3
- (B) 2
- (C) 6
- (D) 4

End of Section I

Section II

60 marks

Attempt Questions 11 – 14

Allow about 1 hour and 45 minutes for this section

Answer each question in a new writing booklet. Extra writing booklets are available.

In Questions 11 - 14, your responses should include relevant mathematical reasoning and/or calculations

Question 11 (15 marks)

Start a new writing booklet

Evaluate $\int_{0}^{2} \frac{dx}{\sqrt{16-x^2}}$.

Differentiate $3x^2 \ln x$, for x > 0.

2

2

Find the acute angle between the lines x+2y-5=0 and y=4x+5, giving your answer (c) 3 correct to the nearest minute.

3

Use the substitution $u = e^x$ to find $\int \frac{e^x}{1+e^x}$ (d)

2

The staff in a school office consists of 5 males and 8 females. (e)

How many committees of 5 staff can be chosen that contain exactly 3 females?

Use the binomial theorem to find the term independent of x in the expansion of

3

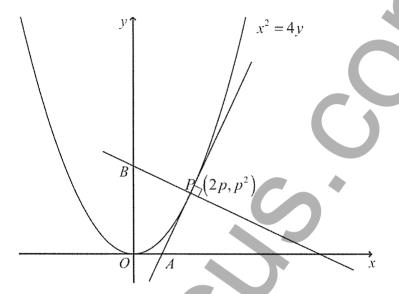

$$\left(2x-\frac{1}{x^2}\right)^{12}$$

(f)

(a) Use mathematical induction to prove that $n! > 2^n$ for integer $n \ge 4$.

3

(b) The diagram below shows the graph of the parabola $x^2 = 4y$. The tangent cuts the parabola at $P(2p, p^2)$, p > 0, cuts the x axis at A. The normal to the parabola at P cuts the y axis at B.

NOT TO SCALE

(i) Show that the equation of the tangent AP is $y = px - p^2$.

2

(ii) Show that the equation of the normal PB is $x + py = p^3 + 2p$.

1

(iii) Find the coordinates of A and B.

2

(iv) Let C divide the interval AB in the ratio 2:1.

- 3
- Find the Cartesian equation of the locus of C, giving any domain restrictions.
- (c) Consider the function $f(x) = 1 + \cos^{-1}(2x 1) 2\cos^{-1}\sqrt{x}$ for $0 \le x \le 1$.
 - (i) Show that f'(x) = 0 for $0 \le x \le 1$.

3

(ii) Sketch the graph of y = f(x) for $0 \le x \le 1$.

1

Question 13 (15 marks) Start a new writing booklet

(a) A particle is moving in simple harmonic motion has its acceleration given by $\frac{d^2x}{dt^2} = -25x$, where x metres is the displacement of the particle after t seconds.

Initially, the particle's acceleration is 50 ms⁻² and after $\frac{\pi}{6}$ seconds, the particle's velocity is -10ms^{-1} .

(i) Find the period of the motion.

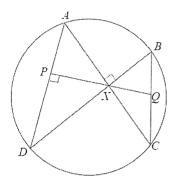

2

1

- (ii) Show that $x = a \sin(5t \alpha)$ is a possible equation of motion for this particle, where α and α are positive constants and α is acute.
- (iii) Show that the amplitude of the motion is 4 metres.
- (iv) Find the value of α .
- (v) Find the greatest speed of the particle and where the particle reaches this speed. 2
- (vi) How many times does the particle change direction in the first 2 seconds?
- (b) Let $(2+3x)^7 = \sum_{k=0}^7 t_k x^k$
 - (i) Write down an expression for t_k .
 - (ii) Hence show that $\frac{t_{k+1}}{t_k} = \frac{21 3k}{2k + 2}$ where 0 < k < 7.
 - (iii) Hence, or otherwise, find the greatest coefficient in the expansion of $(2+3x)^7$.

(a) The diagram below shows points A, B, C and D on a circle. The lines AC and BD are perpendicular and meet at X.

The perpendicular to AD through X meets AD at P and BC at Q.

NOT TO SCALE

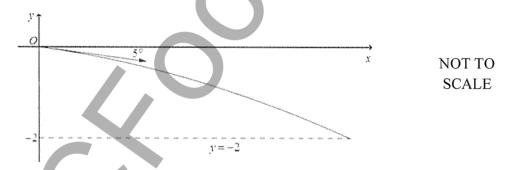

Copy or trace this diagram into your writing booklet.

(i) Prove that $\angle QXB = \angle QBX$.

3

(ii) Prove that PQ bisects BC.

- 2
- (b) A cricket ball leaves a bowler's hand 2 metres above the ground with a velocity of 30 ms⁻¹ at an angle of projection of 5° **below** the horizontal, as shown below.

Using the origin as the point where the ball leaves the bowlers hand, the coordinates of the ball at time *t* are given by:

$$x = 30t \cos 5^{\circ}$$
$$y = -30t \sin 5^{\circ} - 5t^{2}$$

(Do not prove these results)

(i) Find the time it takes for the ball to strike the ground.

2

(ii) Calculate the angle at which the ball strikes the ground.

2

2

(iii) Show the motion of the ball is parabolic, even though it is projected at an angle below the horizontal.

Question 14 continues on page 11

Question 14 (continued)

(c) A television satellite tower stands on a large area of flat ground.

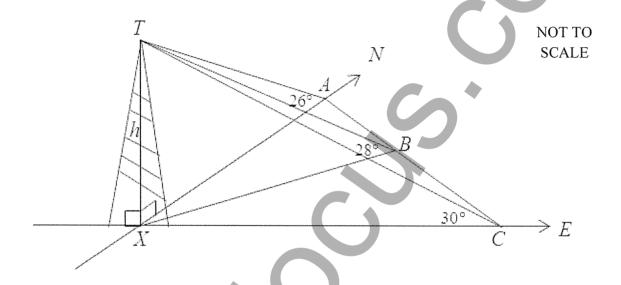

Three maintenance workers, A, B and C, are observing the tower.

Worker A is due north of the tower.

Worker C is due East of the tower.

Worker B is on the line of sight-from A to C (A, B and C are collinear).

The angles of elevation of the top of the tower from A, B and C are 26°, 28° and 30° respectively.

- (i) Find $\angle XAC$, correct to one decimal place.
- (ii) Find $\angle ABX$, correct to the nearest degree.
- (iii) Hence, find the bearing of Worker B from the base of the tower X, correct to the nearest degree.
